DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, 25 (possible claims 19-22, see note below) drawn to apparatus, classified in class 345, subclass 156.
- II. Claims 13-18 and 23-24, drawn to process, classified in class 216, subclass 60.

Note: For claim 19, the applicants wrote "The system of claim 15". This appears to be an error because claim 15 is a method claim and not a system claim. Claims 20-22 all depend on claim 19, thus it must contain the same error. For the purpose of the election/restriction requirement, the examiner will assume that claims 19-22 are apparatus claims (Group I). However, if the applicants believe that claims 19-22 should reflect a method claim, applicants must make an amendment to correct the error. The amendment would make claims 19-22 belong to Group II (i.e. process claims).

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus such as using an etching apparatus without having a processor or a

mean for controlling the etching. The computing and comparing step can be performed by hand.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Himanshu Amin on 1-16-2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
